

# SCI-BONO DISCOVERY CENTRE

Motheo Boroko  
**IT & Facilities Manager**

“Here at the Sci-Bono Discovery Centre in New Town Johannesburg, we have recently invested in the SonicWall Capture Advanced Threat Protection service to add to our world class Super Massive 9400 High Availability pair.

Ransomware is a constant threat with its many and varied attack vectors. The consequences of an attack would be terrible and wide-ranging, resulting in potentially many wasted man-hours in restoring systems and data, disrupting our students and class schedules and delaying projects we carry out for the department of education.

With SonicWall Capture, any unknown files are sent to the Capture sandbox in the cloud where three parallel security techniques - hypervisor analysis, full-system emulation and virtualization - are used to find and block zero-day attacks.

**We are delighted with this new service and feel 100% confident that our network is now safe from outside threats.”**

Dale Honeywill  
**Group Director - IT Evolution  
 SonicWall Partner**

“IT Evolution has been a trusted service provider for Sci-Bono Discovery Centre for many years. After a successful implementation of the SonicWall Super Massive firewall and SonicPoints, we continued to advise the management and technical team of emerging threats in the cyberspace landscape.

With the release of SonicWall Capture Advanced Threat Protection, we presented the additional security features. Media coverage on the dangers of ransomware and rate of growth of the threat made the discussion a fairly easy engagement. The mechanism of the technology and the value of the added protection was easily understood.

After another meeting with the board members, the financials were quickly signed off. Due to the integrated nature of the technology, the upgrade and setup of SonicWall Capture Advanced Threat Protection was completed in a matter of hours.”

Ashley Lawrence  
**SonicWall Territory Sales Lead**

“Apart from the actual procurement process; sourcing, accounts, etc., the actual sales process was completed in just two presentations. The first and more detailed presentation was to Motheo Boroko and his team, where the buy-in was instantaneous.

The second presentation was to the ICT Executive Steer-Co., where we were joined by the incumbent SonicWall Partner to provide the commercials. We presented the technology at a high level and received an immediate green light to proceed. In the meeting, the CEO requested Motheo Boroko to initiate the procurement process.”

## Customer Profile

**Company** Sci-Bono Discovery Centre  
**Industry** Education  
**Country** South Africa  
**Website** [www.sci-bono.co.za](http://www.sci-bono.co.za)
